

CSHALS 2010

Conference on Semantics in Healthcare and Life Sciences

February 24 - 26, 2010

Cambridge/Boston, MA

The ISCB Conference on Semantics in Healthcare and Life Sciences returns for its third year as the premier annual event focused on the use of semantic technologies in the pharmaceutical industry, including hospitals/healthcare institutions and academic research labs.

CSHALS is a conference focused on specific applications of semantic technologies, including Semantic Web, to show where advances have been made, determine what the current needs are, and anticipate where the field is headed in order to prepare and advance with the field. The conference is organized along specific topics and moderated to stimulate interactive discussions around sets of key questions determined in advance with input from registered attendees.

KEY DATES

February 24, 2010

On-Site Registration
& Tutorial

February 25 & 26, 2010

Conference

KEYNOTE SPEAKERS

Jim Hendler

Tetherless World Senior
Constellation Professor
Departments of Computer Science
and Cognitive Science
Rensselaer Polytechnic Institute (RPI)
Troy, NY, USA

Martin D. Leach

Executive Director
Basic Research and Biomarker IT
Merck & Co. Inc.
New Haven, CT, USA

Lynn H. Vogel

Vice President, Chief Information Officer
Information Services Division
The University of Texas
Houston, TX, USA

RESEARCH THEMES

Semantic applications having the biggest impact

Semantics for automated reasoning and agent technologies

Visualization and utilization of information and knowledge using semantic tools

Measurable benefits of Semantic Web standards, such as RDF, OWL, and SPARQL
