

5th Annual Rocky Mountain Bioinformatics Conference

November 30 - December 2, 2007
Aspen/Snowmass, Colorado Silvertree Hotel

Michael B. Gonzales, Ph.D.
Sr. Scientist, Apple Education
Apple, Inc

BIOGRAPHY

Since receiving his doctorate in Molecular Biology from Texas A&M University, Dr. Michael B. Gonzales' scientific work has been focused on various aspects of computational biology including high throughput genomics/proteomics and protein-ligand interactions.

Michael has held senior positions in the biotech industry including Head of Research Informatics at Invitrogen Corporation and Director of Genomics at DoubleTwist Inc. where he led the development of some of the first genome-wide algorithms and systems for data integration.

Prior to joining Apple, Dr. Gonzales held a Senior Fellow position at the Molecular Sciences Institute in Berkley, CA. He continues to hold an affiliation at the institute. At Apple, he heads up Science & Technology in Higher Education and is responsible for developing the strategic direction and marketing programs to facilitate the use of the Mac in scientific applications.
