*Los Alamos National Laboratory, Los Alamos, NM*

# Integrated Protein Relational Database

---

- **Purpose:** *internal support for development of algorithms to infer protein function from a wide variety of data; future underpinning of an external web site for the research community*
- **Why?** *“parse once, run everywhere”; easier to link disparate data sources; centralized, local data source*
- **Data types:** *sequence, structure, annotation, documents, controlled vocabulary, motifs, ontology/categorization, computational results, ...*

# ID-Based Database Links
