CSHALS is the premier annual event focused on the use of semantic technologies in the pharmaceutical industry, including hospitals/healthcare institutions and academic research labs. With an expanded scope that includes the emerging field of data science, CSHALS 2013 should be part of your plans for 2013!

Topics covered by CSHALS 2013 span the continuum between standards development and big data workflows - the scope between Life Science data representation and its analysis.

Register at: www.iscb.org/cshals2013-registration

Conference organizers are accepting abstract submissions for poster and oral presentations in the following topic areas:

- Linked Data
- Data Modeling
- Text Analysis, NLP, Question Answering
- Cloud, Parallel, and Distributed Computing
- Healthcare eScience
- Business Intelligence, Machine Learning, and Analytics
- Human Computer Interfaces
- Clinical Applications
- Molecular Applications
- Applications to Emerging Health Disciplines
