

34th Conference on Intelligent Systems for Molecular Biology

Washington, DC July 12–16

Join us for ISMB 2026!

ISMB is the premier conference in computational biology, bringing together researchers from around the world to share breakthroughs, innovative methods, and advances in bioinformatics. Organized by ISCB, this flagship event fosters collaboration across disciplines, shaping the future of computational biology through cutting-edge research and interdisciplinary connections.

Details

When:

12–16 July 2026

Where:

Washington, D.C.

Registration Details:

[https://www.iscb.org/
ismb2026/register](https://www.iscb.org/ismb2026/register)

Keynote Speakers

Carlos D. Bustamante,
Founder and CEO of Galatea Bio

Richard Durbin,
University of Cambridge

Partha P. Majumder,
John C. Martin Centre for Liver
Research & Innovations

Olga Troyanskaya ,
Princeton University

Marinka Zitnik,
Harvard Medical School
