

34th Conference on Intelligent Systems for Molecular Biology

Washington, DC July 12–16

SAVE THE DATE: 12–16 July 2026

ISMB 2026, ISCB's flagship conference, returns to Washington, DC—the very city where ISCB and ISMB began in 1994!

A HUB OF SCIENCE AND GLOBAL COLLABORATION

Washington, DC is home to the NIH, NSF, FDA, and countless other organizations that drive the life sciences. It's an extraordinary opportunity to connect your work with fellow researchers and agencies shaping global biomedical research.

EASY GLOBAL ACCESS

DC is served by three major international airports (IAD, DCA, BWI), with direct flights from virtually every region of the world, minimizing costly connections and long transfers.

HISTORIC AND CULTURAL RICHNESS

The city offers world-class museums, monuments, and vibrant neighborhoods. Nearly all Smithsonian museums have free admission, making it easy to experience the history and culture that frame global scientific dialogue.

A SYMBOLIC RETURN

By returning to DC after more than three decades, ISMB underscores the global evolution of our field from a fledgling discipline in 1994 to a cornerstone of modern biology today.
